PROFESSIONAL SUMMARY

Entry-level Software Developer with hands-on experience building user-centric web applications using **React, JavaScript, and TypeScript**. Strong foundation in **component-based architecture, state management, and frontend-backend integration**, with a proactive learning mindset, ownership, and curiosity to grow in a collaborative engineering environment.

SKILLS

- **Programming languages:** JavaScript (ES6+), TypeScript, PHP, Python, HTML5, CSS3, C++, C#, JQuery
- **Frontend Development:** ReactJS, React Router, Context API, Tailwind CSS, Bootstrap, Responsive Web Design
- **Backend and APIs:** Node.js, Express.js, RESTful APIs, Firebase (Authentication, Firestore)
- **Databases:** MongoDB, MySQL, SQL Server
- **Tools & Platforms:** Git and GitHub, Postman, Figma, Vite, Render, Vercel, WordPress
- **Concepts:** Object-Oriented Programming (OOP), State Management, Performance Optimization, UI/UX Principles, Component Architecture
- **Soft Skills:** Ownership, Curiosity, Problem-Solving, Communication, Collaboration, Attention to Detail, Fast Learning, Member-Centric Thinking
- **Languages:** English (Fluent), French (Basic)

PROFESSIONAL EXPERIENCE

United Beings Foundation, India (Remote)

Jul 2025 - Sept 2025

Web Developer Intern

- Engineered a fully custom **WordPress** theme (PHP, JavaScript) from static design, reducing page load time by 35% through thoughtful simplification and performance-focused decisions
- Improved navigation and layout architecture to offer a smoother, more accessible, member-centric user journey.
- Delivered features with strong ownership in a distributed, mission-driven team, maintaining clear written documentation and transparent communication.
- Ensured **cross-device responsiveness** and reliability by applying best practices in structured **problem-solving** and user-first design.

wellYou / Happy Nation, Berlin (Remote)

Mar 2024 – Dec 2024

Frontend Developer Intern

- Built intuitive, member-centric web interfaces using React and Tailwind CSS, improving page performance by 0.8s through disciplined execution and simplicity-focused refactoring.
- Enhanced overall site performance by 20% by optimizing rendering pathways, demonstrating strong problem-solving and a continuous improvement mindset.
- Integrated complex **RESTful APIs using Axios and React Hooks** to deliver seamless user experiences aligned with customer-led development.
- Collaborated effectively in a transparent, async remote environment while practicing best coding standards, code reviews, and empathetic communication.

PROJECTS

HelpHub — Real-Time Community Support App

(React + TypeScript | Firebase Auth & Firestore | Vite)

Demo- <https://community-helper-iota.vercel.app/>

- Developed a real-time community support web application using **React** and **TypeScript**, enabling users to sign up, log in, and post help requests within their local community.
 - Implemented **Firebase Authentication** to support secure email/password login and signup, handling authenticated user sessions across the application.
 - Integrated **Firebase Firestore** as the backend database to store and retrieve user-generated requests, enabling real-time updates without manual page refreshes.
 - Built responsive, reusable UI components using **Tailwind CSS**, supporting consistent layouts across 4–5 core pages (auth, feed, create request, details).
 - Managed client-side state using **React hooks** (useState, useEffect) to synchronize UI with live Firestore data streams.
 - Enabled real-time data rendering using **Firestore listeners**, allowing new or updated community requests to appear instantly for all users.
 - Deployed the application on **Vercel**, delivering a live, production-ready frontend and demonstrating full deployment ownership.
 - Iteratively tested authentication flows and real-time updates, fixing edge cases related to session persistence and UI re-rendering.
-

Flower and Gift Shop – MERN E-Commerce Application

Demo- <https://flower-shop-zsdd.vercel.app/>

- Developed a user-centric e-commerce web application using **React (Vite)**, delivering intuitive product browsing, cart management, and checkout experiences across 5+ core user flows.
 - Implemented global state management using **React Context API and hooks**, coordinating cart state, user sessions, and UI behavior across **10+ reusable components**.
 - Translated UI requirements into responsive, accessible components using HTML, CSS, JavaScript, ensuring consistent behavior across desktop and mobile layouts.
 - Integrated **Node.js** and **MongoDB** backend services with the React frontend to support end-to-end CRUD operations for products, users, and orders.
 - Built an **Admin** dashboard enabling management of **20+ products** with full create, update, and delete functionality, demonstrating ownership across the full development lifecycle.
 - Integrated **Cloudinary API** to manage 100% of product image uploads, improving image handling scalability and reducing client-side load complexity.
 - Identified and fixed UI bugs related to cart state synchronization and navigation flow, improving application reliability during user testing with **5+ users**.
 - Collaborated using **Git** and **GitHub**, delivering 150+ commits through iterative development, feature enhancement, and refactoring.
-

EDUCATION

▪ **Humber College, Canada**

Jan 2024 - Dec 2024

Post Graduate Certificate in Web Development - 78.7 /100

▪ **Humber College, Canada**

Jan 2023 - Aug 2023

Post Graduate Certificate in Artificial Intelligence with Machine Learning - 81.0 /100

▪ **SRM University**

July 2018 - May 2022

Bachelor's in technology - Computer Science and Engineering – 9.2/10
